BASIC-ABSTRACT: NOVELTY - An order receiving computer (3) receives order of article input continuously through internet (7). A modifier (4) changes the price of an article based on the demand for the article. The price provider (5) provides changed price of articles for orderers (8a-8c) through the internet.

USE - For setting price of article using internet.

ADVANTAGE - Maintains supply and demand balance by modifying price of article based on demand condition.

DESCRIPTION OF DRAWING(S) - The figure shows the conceptual diagram of the order receiving system. (Drawing includes non-English language text).
